

Door Factory Premium 2019 Readme

Information for the RevitWorks Door Factory Premium 2019

By installing the latest version of the Door Factory 2019, any previous versions will be retained (i.e. Door Factory for 2017, 2016 etc.)

Previous Version Default Values

If you have amended the default values that the Door Factory uses, copy the *DefaultValues_I.txt* and *DefaultValues_M.txt* to the new locations as shown.

Copy from C:\Program Data\RevitWorks\Door Factory (*version number*)

Copy to C:\Program Data\RevitWorks\Door Factory 2019

Previous Version Customised Components

If you have created additional components in previous versions of the Door Factory, we suggest that you copy them to the correct sub-directories under the new Door Factory 2019 Component Directory and then manually upgrade them to Revit 2019. They will then appear in this version of the Door Factory as well.

Please also refer to the [Multi User Recommendations Document](#) for instructions on how to use shared network drives for these components.

Revision History

V19.4.3	Clearance diagrams added to standalone installations as expected
